Department of Energy

Career Achievement Award

Presented to

Mr. Tom Reilly

The Department of Energy (DOE) Nuclear Criticality Safety Program (NCSP) recognizes Mr. Tom Reilly for his outstanding service to the Criticality Safety Support Group (CSSG). Mr. Reilly was a charter member of the CSSG and served as an active member of the group for nine years. During this time he was instrumental in the development and review of numerous DOE Orders and Standards, including DOE-STD-3007-07, Guidelines for Preparing Criticality Safety Evaluations at Department of Energy Non-Reactor Nuclear Facilities; and DOE O 420.1A and B, Facility Safety. Mr. Reilly's practical experience, stemming from over 30 years of supporting criticality safety at facilities where production, manufacturing and recovery operations involving fissile materials were conducted, was invaluable in ensuring that practical solutions to criticality safety issues were developed and implemented. Mr. Reilly's quiet demeanor and technical depth of knowledge provided a unifying force within the CSSG and as such was one of the primary reasons for the group's success. I want to take this opportunity to thank Mr. Reilly for his outstanding service to the CSSG and offer my best wishes for success as he continues to take on new challenges in the years to come and continues to make contributions to the important area of criticality safety.

A handwritten signature in black ink, reading "Tom D'Agostino". The signature is written in a cursive, flowing style. The first part of the signature, "Tom", is written with a large, stylized 'T' that loops around. The last name, "D'Agostino", is written in a more standard cursive script. The signature is positioned above a horizontal line.

Tom D'Agostino
Administrator, NNSA
